PORTFOLIO PROJECT

Pizza Sales Data Analysis & Power BI Dashboard

#PowerBI #SQL #Excel #DataAnalysis #DataAnalytics #PortfolioProject

- Analyzed pizza sales data using SQL queries and aggregate functions to calculate total revenue, total orders, pizzas sold, average order value, and average pizzas per order.
- Evaluated sales trends by day, month, and hour, and compared performance across pizza categories and sizes to understand ordering patterns.
- Identified top-selling and least-selling pizzas to highlight product performance and potential opportunities for menu planning and promotions.
- Built an interactive Power BI dashboard with KPI cards, charts, and filters; checked key dashboard calculations against SQL results to support reliable reporting.
- **Project Repository:** https://github.com/Seema3104/SEEMA/tree/main/PROJECT

ACADEMIC PROJECTS

Preservation and Maintenance of Actinomycetes Culture

M.Sc. Project

Studied culture growth and preservation of Actinomycetes culture by Cryopreservation and Lyophilization methods.
